6. Discussion of the Resilience Cycle – with a focus on recovery actions. The 2019 Hazard Mitigation Plan included results of a public survey done in Fall 2017. The responses provide an indication of the public perception regarding the level of risk, awareness of natural hazard mitigation planning, and emergency response on Nantucket.

Survey-takers were asked to rank a set of activities, intended to restore daily life after a hazard event, from most important (1) to least important (10). The average rating of each action was taken to calculate the overall importance of each. These results are presented in Table 1-17.
