Concerns (2:34)	(1:35) Motion to Hold for representation. (Welch) Carried 5-0//Oliver, Coombs, Welch, McLaughlin, and Camp-aye Ewing – Presented project, circa 1950. Backus – This is a contributing structure according to the National Historic District; the 1980 survey had it as non-contributing. Read HSAB comment 6/28: No concerns. Thornewill – Sees no architectural merit to the building; only the age makes it a contributing structure. No concerns.

Concerns (2:41)	(1:35) Motion to Hold for representation. (Welch) Carried 5-0//Oliver, Coombs, Welch, McLaughlin, and Camp-aye Ewing – Presented project; open to revisions per HSAB comments; no room on east for covered entry; 27'7". Backus – Read HSAB comment 6/28: shingle field too large; suggest larger windows or another bay; question the shown subrake; rake needs to be shown correctly and recorded on application; taller windows on south elevation (visibility); left 2 nd -floor window east elevation should be larger to match other units; east elevation is visible; covered entry on east to break up shingled wall; more windows would help. Oliver – This sits in a bowl; that will mitigate the height. This is a basic box, Nantucket-style house; there are buildings very tight to both sides. Ms. Ewing should do a survey of structures along the street. Thornewill – Agree with HSAB it might want to be 4-bay; height should come down, so eaves touch the headers; Andersen windows are not appropriate especially on the front and sides; should be true divided light windows. Chunkier plank frame window trim might help. Height is 28'6" from grade. McLaughlin – No concerns. Coombs – Front door needs a railing. This needs 1-story additive massing. Camp – She's not comfortable with allowing generic architecture in the old historic district (OHD); bring the height down, and it needs additive massing and some character that's appropriate with the neighborhood. Welch – Ms. Thornewill's plank frame comment is appropriate. Historically this type of building would be on Union or Orange Street and dressed up. Historically this style house would have additions off the rear. If the framework is consistent with history, we should go with that.

 Concerns (1:37) **O’Callaghan** – Presented project.
 Thornewill – 1-over-1 windows don’t work here; 2-over-2 is better but other grill patterns would be okay.
 Oliver – Agrees with Ms. Thornewill.
 Coombs – Prefers 6-over-1. West elevation saltbox, the mulled windows should be separated (existing).
 McLaughlin – Asked about the metal stack on the roof (being removed). No concerns.

Motion **Motion to Approve through staff with windows to have a grill pattern of the applicant’s choice; and grey windows and doors. (Oliver)**

 Documentation Architectural elevation plans, site plan, photos, correspondence, and advisory comments.
 Representing Sophie Metz
 Public Joan Taylor, 16 Mill Street, represents her family and all four abutters
 Anne Dewez 5 Mill Street, for 48-strong neighborhood group

Concerns (1:47) **Metz** – Reviewed changes made per previous concerns; set house down at elevation 47; she can do a tree survey.
 Backus – Direction overall is good; south gable should be simpler; rear elevation should have structure similar to that on the structure as viewed from Lily Pond; front should be more in keeping with the OHD. HSAB didn’t see the revisions.
 Taylor – We are members of a homeowners’ association for Mill and North Mill Street area. Appreciates the changes but they haven’t gone far enough. North elevation, prior HDC concerns still stand; asked HDC to look at the aesthetic of the north elevation. Our biggest concern is the height; it’s almost 30’ and from the Pony Park it will look over 30’. Any adjustment of wings the, which aren’t subordinate, would allow the main mass to read as a traditional Quaker home; as proposed it doesn’t fit with architecture in the area. Appreciates the simplification; but, don’t think it reflects the neighborhood’s Quaker architecture. Read a letter of concerns from Sandy Holland into the record.
 Dewez – There is a very clear and visible group behind Ms. Taylor. This subdivision has a visibility that has no comparison anywhere.
 Coombs – The house is still too big; it’s a 30’ tall, 50’ long rectangle in an area where houses are small; there’s room on the lot for additive massing. A charge of the HDC is to ensure a new house fits into the area. Also, houses in this area have open space around them and this doesn’t. This shouldn’t be 3 stories in one of our most historic areas.
 Oliver – This needs to be rethought. The proportions feel off; the mid-section should be larges with subordinate masses. The footprint is a very modern configuration. Simple is better. Looks like the whole building could move south and mitigate some of the underground level. The 10/12 roof would read well as a 9/12 and bring the height down. The connector shouldn’t die into the mass it’s connected to. The wing should shift back so as not to overpower the main mass. South elevation, right 1-story mass doesn’t need the gable; dormers over the kitchen could be eliminated making it a simpler, more Quaker style house. East elevation main mass needs a gable window. Same on the rear; gable forward should be a simple shed. There’s a lot that could be done to simplify this.
 Thornewill – The highest ridge is only 25’ long then drops down. There are a ton of deciduous trees; asked what will happen to them; it would help to know which trees are staying and which will be removed. Agrees with much Ms. Oliver said. Will need to hide the basement; this is a rural area, but the subdivision is being treated like it’s downtown. Bring the height down; focus on simplifying the north elevation massing. You could turn it to show a simple elevation especially toward the Pony Field. The main mass is too small for the big wings.
 McLaughlin – The size of this very large trophy house near the windmill and will stand out. There is a conglomeration of too much glass and chaotic sizing; windows should be more homogeneous. This is not a Nantucket style and doesn’t match the neighborhood. This needs a lot more work.

Motion **Motion to Hold for revisions. (Oliver)**
