Documentation	Architectural elevation plans, site plan, photos, and advisory comments.				
Representing	Bill McGuire, Nantucket Architectural Group				
Public	None				
Concerns (1:05)	<p>McGuire – Presented project; not visible even from Hussey Street; agrees with keeping the window with a single French door with kick panel or move the window to the basement stairs and keep the double 12-light French doors with kick panel.</p> <p>Backus – This is contributing circa 1780 typical Nantucket structure contributed to Barnabas Coleman; there was no historic information on the application when it's imperative that we have that; the property had additions in 1990s; the change is on the historic portion of the house; should be a single door with the removed window saved.</p> <p>Coombs – Likes Ms. Backus idea of a single door with a panel at the base; the removed window must be saved for future use. She could accept moving the window right but wants the door to be a single French door.</p> <p>Thornewill – If they use a single door, they can leave the window; not adverse to 12-light French doors with wood kick panels because this is not visible; this is also minimally invasive to the historic structure.</p> <p>Welch – Agrees with Ms. Thornewill. He feels Ms. Backus should feel confident that she has our backing; if this information in the future is not included, she can deem the application as incomplete.</p> <p>Camp – Likes the French doors with kick panels as long as the existing window is saved for future use; she likes the balance of windows on this elevation.</p>				
Motion	Motion to Approve through staff with 12-light French doors with kick panels aligned under the 2nd-floor window and reusing the old window in the basement stairs. (Thornewill)

Concerns (1:21)	<p>Kotchen – Presented project; this is not visible; going to 26'6"; claims he can't bring the height down 2'6" because of position of door and need for head height; this matches the aesthetics of the house; the door is 7'.</p> <p>Thornewill – She liked the previously approved; it's a funny proportion but not visible.</p> <p>Welch – Agrees; okay with it so long as it's not visible.</p> <p>Coombs – It should be no more than 24' tall.</p>

Concerns (1:27)	<p>Newman – Presented project; could move back 4’ or 5’.</p> <p>Thornewill – This positioning isn’t too different from others on the same side of the street. It looks like a good change.</p> <p>Coombs – Would like it moved a little off Cliff Road.</p> <p>Welch – It’s appropriate. He’s not sure 4 or 5’ is huge; it should stay within the line of other structures fronting on Cliff.</p> <p>McLaughlin – The change and structure are appropriate; he would approve as submitted.</p> <p>Camp – Wants it to have the same setback as houses either side of it.</p>

Voting Camp, McLaughlin, Coombs, Welch, Thornewill
 Alternates None
 Recused None
 Documentation Architectural elevation plans, site plan, and photos.
 Representing Elizabeth Dunne Marcoullier
 Public None
 Concerns (1:46) **Marcoulier** – Presented project; 24’” existing; south elevation is enclosed to hide the pool equipment.
McLaughlin – The deck is over 8’ deep and should be pulled back. South elevation, the meeting rails do not align.
Thornewill – The front elevation, the dormer is overwhelming and has awkward window alignment; the dormer should be set back from the wall and the windows reduced about half in size. The stairs should be tucked within the 8’ dept of the deck.
Welch – The deck is 8’ deep. His concern is size of windows on the north elevation but okay with their positions. This massing is similar to 9 Washing Pond Road.
Coombs – The dormers overpower the garage; the north elevation windows should not be mulled, and the left extension of the dormer eliminated. South elevation, this is a garage and the dormer again should be reduced. The 2nd floor is top heavy. Agrees about pulling the stairs to within the 8’ depth.
 Motion **Motion to Hold for revisions and images of similar structures in the area. (Welch)**

 Documentation Architectural elevation plans, site plan, photos, correspondence, historic documentation, and advisory comments.
 Representing Chip Webster, Chip Webster Associates
 Public None
 Concerns (1:57) **Webster** – Presented project; circa 1965; we are reaching out to affordable housing.
Backus – The HDC survey was not included in the application; this is contributing based upon information provided from NPT – reviewed that information; deed restriction requires it be a single-family dwelling; in 2008, HDC reviewed a demolition prior to historic structures update. Concurs with HSAB. This is where cultural history outweighs architectural significance.
 Read HSAB comments 8/30: no survey or historical information; former owners include Walter Beinecke Jr. and sculptor Seward Johnson giving this historic relevance; it’s a unique example of post-modern architecture representing that period on Nantucket; would prefer to see this home renovated rather than demolished.
Coombs – This building needs to be left where it is; it fits into the streetscape. She opposes a demolition or a move.
McLaughlin – Visually this structure has no historical aspect. He thinks it should be demolished. He voted against approving this structure in 1965.
Thornewill – This is an anomaly on Easton Street; the only reason to keep it is because it’s tucked in. She doesn’t see the architecture as having anything to do with Nantucket. At the other end of the point, a couple of buildings have been allowed to be moved or demolished.
Welch – He tends to agree. It is our more modern history with historic reference to character. He’d like to see if this is uniquely qualified to be moved off and reused as bungalows for affordable housing. It could be put to good use. He’d want the replacement structure to echo the soft green break of this site.
Camp – She is with Ms. Coombs. Appreciates the history with the Beinecke and where it came from; it has relevance.
 Motion Motion to demolish. (McLaughlin) not carried//Welch, Thornewill, Coombs and Camp-nay
Motion to Approve the move off/demolition through staff with the applicant is to reach out top affordable housing with elevation drawings, interior photo documentation, and written history submitted into the file. (Welch)

Concerns (2:17)	<p>Kuszpa – Explained rooftop solar will help keep utility expenses down for residents of affordable housing. This is a rental in perpetuity and we’re applying for it to go on the SHI list.</p> <p>Carruthers – Presented project; not visible from Okorwaw.</p> <p>McLaughlin – These are nice outside the old historic district (OHD), not inside the OHDs. He’s okay with this even though it will be visible.</p> <p>Welch – It’s important to clarify that our designation is for the whole Island; the Federal government doesn’t recognize our OHDs. This meets all our solar guidelines except it’s not a black roof; the mitigating factors overcome that.</p> <p>Thornewill – Agrees with Mr. Welch. This is on the rear; if plants die, they will have to be replaced to mitigate visibility.</p> <p>Coombs – Thinks this is far enough off the road to not make out.</p> <p>Camp – We have to be careful with second generations to keep up the lack of visibility.</p>

Concerns (2:34) **Carruthers** – Presented project; the view will be blocked by vegetation from anywhere except the driveway.

Coombs – This doesn't fit our guidelines: it's on the front and visible.

Welch – He thinks there is visibility; asked to view this. He'd like to see the presentation of panels more uniform; the broken first row should be on the top unless they can create a solid rectangle.

Thornewill – It goes against our guidelines. Asked if it's possible to have a ground array.
